## PROFESSIONAL SUMMARY

Migration Consultant with 2+ years of experience in Pharmacovigilance and Life Sciences domain specializing in Argus Safety, Veeva Safety, data migration, SQL/PLSQL development, validation, and UAT support. Experienced in Argus upgrades, source-to-target mapping, reconciliation, production migration support, Cognos report validation, and defect management for Tier 1 pharmaceutical clients.

## PROFESSIONAL EXPERIENCE

**Pinnaxis IT Solutions Pvt. Ltd., India** | Associate Consultant | Jan 2024 – Sep 2025

- Technical Validation Analyst – Developed complex PL/SQL queries to validate custom Cognos safety reports for LSMV systems; performed backend data validation and defect tracking.
- Data Migration Developer (Argus to Veeva) – Created source-to-target mappings, codelist mappings, staging tables, and PL/SQL migration scripts for extraction, transformation, and loading.
- Supported code deployment, dry runs, production migrations, post-go-live support, and complete UAT lifecycle including evidence collection and defect resolution.
- Developer (Argus Upgrade & Migration) – Migrated data from custom tables to Out-of-the-Box Argus tables and updated legacy report dependencies.
- Created Minus Queries and Business Logic validation queries to reconcile migrated data and ensure successful production cutover.
